## **DETAILED ACTION**

### ***Election/Restrictions***

1. Claims 1-59 are generic to a plurality of disclosed patentably distinct species comprising cyclodextrin compositions. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species as in an example, even though this requirement is traversed. One method commensurate in scope with the species will be examined as well.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
